

Use Cases: Curriculum Implementation

Lecture-based learning

- Insert real cases into .ppts
- Bring lectures to life

Asynchronous learning

- Assign cases
- Great for long-distance learning

Synchronous learning

- Present a ReelDx case during class to guide clinical reasoning

Simulation

- Design scenarios w/real pt. cases
- Improve suspension of disbelief

Standardized testing

- Use real pt. scenarios for testing

Communication exercises

- Practice summary presentations using real patient cases

Self-guided learning

- Use as supplemental learning resource during clinical rotation
